

PS-6 Pedestal Assembly and Mounting Instructions

NOTE: This pedestal is designed for use with Bose® 901® speakers only. The use of this pedestal with any other speaker, including those by Bose, is not recommended unless specifically stated in that product's Owner's Guide.

1. Unpack all parts taking care to avoid damage to finished surfaces.
2. If pedestal is used on non-carpeted floor, stick five rubber feet (provided) in bottom of pedestal base, spaced equally as shown in Figure 2.
3. Place speaker upside down on soft surface.
4. Pass speaker wire through the pedestal assembly stem from the bottom.
5. Connect the wires to the speaker terminals, paying attention to polarity (+ / -) as per the 901 Owner's Guide instructions. Leave an extra loop of wire near the terminals to avoid strain.
6. Line up pedestal holes with holes on speaker cabinet and mount pedestal using the provided wood screws (#8-10 x 3/4" long, Phillips pan head #6 black steel) and companion washers.

CAUTION: Just as you keep children away from lamps that might tip over, you should keep them away from pedestal mounted speakers.
